

CORPORATE PROFILE

Tim Weston is a business analyst and project manager available to assist and support organisations in evaluation of business opportunities, creation of new businesses and the enhancement of existing operations. Tim has a proven ability to lead or contribute to business initiatives at both strategic and operational levels. These include:

- Business planning and strategy development
- Selection, design and implementation of business and information management systems
- Development of performance tracking frameworks
- Feasibility studies and due diligence reviews

Tim Weston has technical (B.Sc. Hons – Metallurgy) and business (MBA) qualifications. Career highlights from over fifteen years experience in new business development, business analysis and project management include:

- Business requirements study for new IT systems (major Asian coal producer)
- Business process mapping and analysis (coal export terminal)
- Quality management systems review (Australian software development organisation)
- Implementation of a \$6m IT systems upgrade project (coal export terminal)
- Analysis and due diligence of new business opportunities (global resources company)
- Bankable and general feasibility studies (international engineering services firm)
- Technology development / commercialisation (iron ore direct smelting).

Engagements generally relate to specific projects or programmes, have set time windows and/or agreed entry/exit points and specify defined deliverables or business outcomes.

The TW&A service includes:

- A “small business” cost structure
- A focus on delivering business outcomes
- A simple “all inclusive” schedule of rates with fees invoiced monthly
- Public Liability insurance (\$10m)
- Professional Indemnity insurance (\$1m per event).
